Art Unit: 2161

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-60 and 92-95, drawn to an integrated and secure system, classified in class 709, subclass 223.
  - II. Claims 61-91, drawn to an integrated and secure method for conducting business over the public Internet, classified in class 705, subclass 1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different product as evidenced by applicants, claims 1, 16, 22, 30, 56, and 92.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. If applicants elect Group I, the following election of species is required:

This application contains claims directed to the following patentably distinct species of the claimed invention: at least three species identified as,

Art Unit: 2161

(1) a system comprising protocol, at least one secure web server, at least one dispatch server, and a plurality of system;

(2) a system comprising protocol, at least one secure web server, at least one dispatch server, and a report requestor; and

(3) a system comprising protocol, at least one secure web server, at least one dispatch server, and an event monitor application.

5. If applicants elect Group II, the following election of species is required:

This application contains claims directed to the following patentably distinct species of the claimed invention: at least two species identified as,

(1) an integrated and secure method comprising the steps of (a) managing a plurality of enterprise system resources for the customer, wherein the resources include a toll free network manager and (b) converting a customer request to modify a routing plan to a proxy request for the toll free network manager and providing near real time monitoring of the customer's voice traffic; and

(2) an integrated and secure method comprising the steps of providing a plurality of system resources for the customer, wherein the system resources include an order entry application which enables the customer to add, delete and modify services provided by the communications network to the customer.

Art Unit: 2161

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

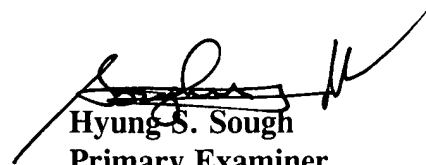

Art Unit: 2161

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hyung S. Sough whose telephone number is (703) 308-0505. The Examiner can normally be reached Monday-Friday from 8:30 AM - 4:00 PM EST.

If attempts to reach the Examiner by telephone are unsuccessful, The Examiner's Supervisor, James P. Trammell, can be reached on (703) 305-9768.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)305-3900. The Group Fax number is (703) 308-1396.
